E-Mail Creator: Design mailings by drag and drop

The E-Mail Creator makes designing newsletters a pushover. After choosing the right template for your newsletter of the Layout Builder, just place suitable text and picture blocks by drag and drop and fill them with required content – even without HTML knowledge.

1. Choose template

2. Insert building blocks using drag and drop and fill them with content

New rows and content can easily be added, building blocks can be resized to the desired width or height. Before sending your mailing you only have to make basic settings like subject, sender name, sender e-mail, mailinglist, mailtype, etc.
