E-Mail Creator

Creating responsive newsletters – even without HTML knowledge.

The E-Mail Creator makes designing newsletters a pushover: Mailings are created very quickly and easily with the help of different layout templates and diverse text- and picture blocks. Several newsletter elements can be inserted and placed arbitrarily using drag & drop.

1. Choose your layout

Choice of different templates included, individual templates available on request

2. Insert your content using drag & drop

Insert new rows or blocks, resize the blocks to the desired width or height
E-Mail Creator

3. Adjust your mail settings and check the mailing preview

Adjustment of basics like mailing name, subject, sender e-mail, sender name, mailing list etc., control of the presentation on different devices with the mailing preview.

4. Send your mailing. Finished.

The responsive templates make sure that the mailings also look good on mobile devices.
